

Reproducibility report

HPT and Extremism project

2026-10-02

Scope

This documentation report records reproducibility metadata for the public, de-identified package. It does not load confidential data.

Public-data checksums

Table 1: SHA-256 checksums for public analysis data

SHA256

Seed policy

The numbered analytic reports set a seed only where stochastic processing is used. Report 03 sets 1234; the revision bootstrap uses 20260910. Other analyses are deterministic conditional on the declared data and package versions. Exploratory scripts retain their own documented seeds.
