

A. HPT Score Distributions

B. Predictor and Control Distributions

Note. Panel A shows distributions of HPT subscale means (POP items reverse-scored) and the primary composite (CTX6 = mean of POP_rev and CONT).

Panel B shows distributions of ideology (FR-LF), authoritarianism (KSA-3), historical knowledge (KN, sum 0–6), and social desirability (SDR-5).

N = 276–293 depending on variable completeness.
